

Who we are:

The Cambria Somerset Authority (CSA) is a municipal authority formed by the Boards of Commissioners of Cambria and Somerset Counties to purchase and operate the former Manufacturer's Water Company (a subsidiary of Bethlehem Steel). CSA maintains Wilmore, Hinckston Run and Quemahoning surface water reservoirs and two river intake dams: Border and South Fork, as well as over 5,000 acres of land.

What we do:

1. Sole provider of high-quality industrial water for Cambria and Somerset Counties
2. Provide diverse recreation opportunities to enhance quality of life in the region
3. Practice conservation of our natural environment to ensure its availability for future generations
